

## ■ Revolutionary approach to maintaining Carpark Vehicle Inventory

### ■ VECON-VLS

VECON-VLS (Vehicle Location System) enables a parking lot operator to automatically record the license plate number and parking space number location of all vehicles in the parking lot. This solution allows the lot operator to provide a value added service to parking patrons in the event that they are unable to locate their vehicles.

Vehicle Location System

### ■ Features & Benefits:

- Fully portable system
- Automatic real-time recognition of license plate and space number
- Uses standard off-the-shelf hardware
- No external triggering mechanism required
- Cost effective, accurate, and easy to install/operate
