

■ Global License Plate Recognition (LPR) Solution

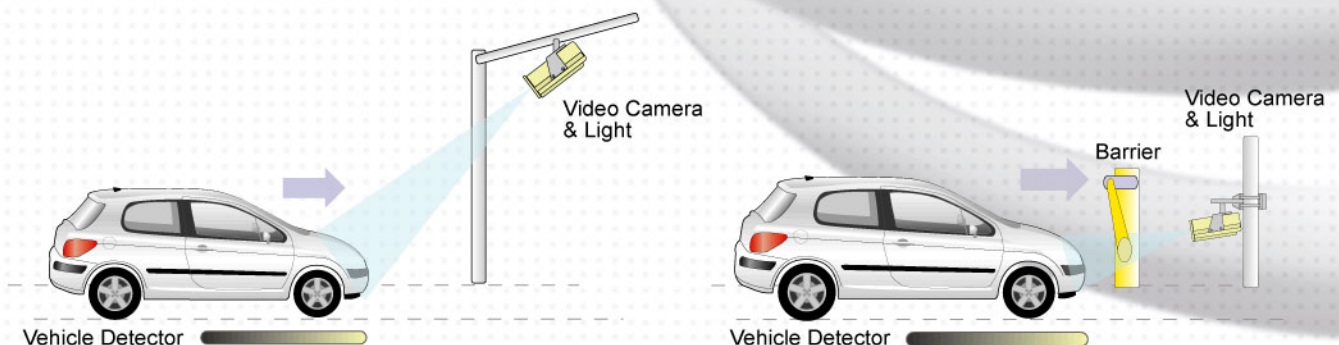

VECON-VIS, the flagship product of Asia Vision, is a versatile license plate recognition (LPR) system that can be applied in various business areas including intelligent traffic systems (ITS), parking lot facilities and fleet management, traffic and road patrol, highway, toll, booths, checkpoints, border security and surveillance. The system automatically detects, recognizes and verifies vehicle license plates both alphanumeric and non-alphanumeric. VECON-VIS has successfully recognized over 20 countries' license plates in multiple languages including English, Chinese, Korean, Japanese, Thai, Spanish and Portuguese.

User Interface

Key Features/Benefits

- Cost effective and reliable LPR solution with U.S. patented OCR technology.
- Alphanumeric and non-alphanumeric LPR recognition.
- High accuracy rate of recognition in various lighting conditions.
- High quality images capture of vehicles and licenses plates anytime, anywhere.
- Remote or on-site vehicle surveillance.
- Easy installation and maintenance.
- Ease of integration with other systems or site management software.
- Built-in database management module for vehicle information and reporting.
- Real-time images searching and retrieval.

Wide Range of Applications

- Automated toll collection point operation.
- Road, highway and traffic law enforcement and surveillance.
- Fleet management for shuttle bus stations and vehicle depots.
- Vehicle parking validation for commercial buildings and parking lot facilities.
- Vehicles' access control and security management for restricted and residential areas.
- Border security and access control.
- Gate management of container terminals.
