

# VECON-CON

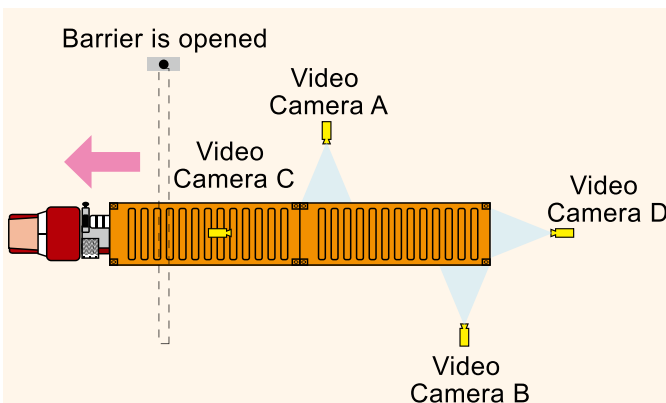

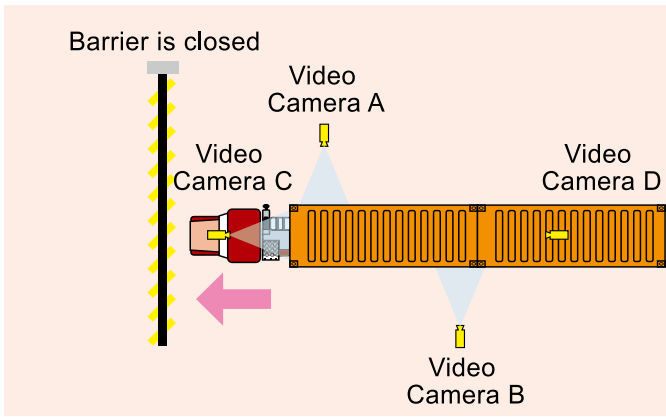

Container Number Recognition System  
Specialized for Modern Container & Terminal Management

VECON-CON is developed for modern ports and terminals to enable their effective operations of gates, quay cranes and spreaders.

It automatically recognizes and records of container ID number, chassis number and ISO code in motion.

It can be integrated seamlessly with another solution of our VECON-VIS, the license plate recognition system for access control and security management.

## KEY FEATURES

- Support all standards ISO containers
- 24-hour automatic real-time recognition and verification
- Process image within 1 second with high recognition rate without sacrificing normal operations
- Real-time global tracking
- Customized loading list and terminal management database interface and multi-platform interface
- Minimize outdoor manual labor
- Reduce errors and safety issues

## CREDENTIALS

Hong Kong CSX World Terminal

## APPLICATIONS

- Toll collection points control for container logistics
- Cargo security at terminals
- Terminal gates
- Container terminal logistics
- Container inventory management at yards
