

VECON-THO

System for Effective Loading and Unloading Management in Yard Operations at Container Ports and Inland Container Depots (ICD)

VECON-THO, automatically captures, recognizes, records, and verifies the ID number of the container during the loading or unloading operation, ensuring accurate movement and streamlining the operation at the yard.

The system performs well under harsh conditions in the marine terminals. It can be remotely monitored and/or controlled via wireless local area network (WLAN).

KEY FEATURES

- Support all standards ISO containers
- Real-time automated recognition, verification without sacrificing normal operations
- High accuracy rate (with an option for list matching which further increases the accuracy rate)
- Real-time global tracking
- Automatic controls of camera exposure
- Increase the system accuracy by using GigE Camera
- Communication with a Programmable Logic Controller
- Reduce misplacement
- Minimize outdoor manual labor
- Reduce errors and safety issues

APPLICATIONS

- Container movement at terminals
- Container loading/unloading management
- Containers storage & yard planning
- Container inventory management

CREDENTIALS

- California, U.S.A.
